INSTRUCTIONS FOR RESIDENTIAL CUSTOMER TO HAVE POWER CONNECTED

In order to receive power for a SINGLE FAMILY RESIDENCE after your power has been disconnected due to electrical tampering/safety hazard you must follow these instructions.

Any safety violations must be corrected by a licensed electrical contractor with a safety permit. This work must pass inspection.

INSTRUCTIONS TO BE FOLLOWED

1. The OWNER of the property must hire a licensed electrical contractor to pull a permit for a safety inspection and any electrical work that may be required.
2. Prior to completing all necessary work the contractor must have an inspection by the City Service Planner from the Electric Utilities Department. Please be aware there may be additional work necessary to connect services at the property.
3. After all work is completed by the contractor and the Electric Utility Department the Contractor must submit a notarized letter stating the premises are in safe condition for electrical power. The contractor must call for an inspection, so the City Electrical Inspector or County Electrical Inspector can complete the inspection for approval of power to be reconnected.
4. Upon approval by the electrical inspector, the Customer Service Department will be notified by FAX of the APPROVAL by the DEVELOPMENT SERVICES DEPARTMENT.
5. After steps 1 thru 4 have been completed the customer shall go to the Customer Service Department to submit all fees, required paperwork and copies of electrical inspection permit.

THIS IS ONLY A GENERAL GUIDELINE FOR A CUSTOMER TO OBTAIN POWER; THE CITY OF HOMESTEAD RESERVES THE RIGHT TO REVIEW APPLICATIONS ON AN INDIVIDUAL BASIS.

Any further questions, please contact Richard Vega, Superintendent in Customer Service at 305-224-4802 and/or Tom Lampert, Building Official in Development Services at 305-224-4520 and/or Tim Hoffman, Service Planner in Utilities at 305- 224-4724.
